

UK Storage Company Ltd

The UK Storage Company have multiple self storage facilities in the South west of England in easily accessible locations such as Bristol, Bridgewater, Taunton and Plymouth.

John Lamb of UK Storage explains, "Our business customers needed access during office hours, Monday to Friday, and our Home customers required access 24 hours a day, 7 days a week. We also needed to be able to set up or change users access rights instantly to any of our Network of storage locations remotely"

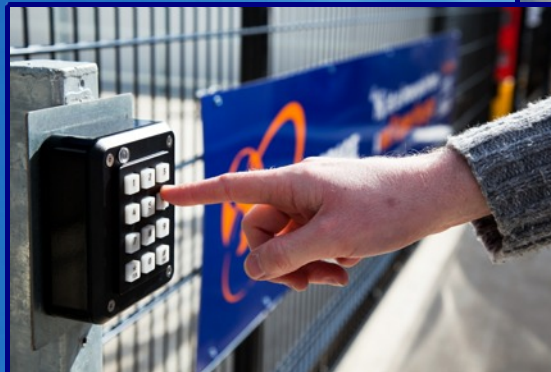

"Their response rates and backup have been excellent and we wouldn't hesitate recommending them."

BAC provided UK Storage with a new system that grants access to the sites by issuing each Customer a unique access code, only validated on pre-defined dates. The system tracks all entry times and dates and is fully addressable remotely.

BAC have also installed fully automated Gate systems at sites as well as being on call for UK Storage on a 24/7 basis.

"We originally used BAC to kit out our Bristol storage site with gates, entry system and security cameras. We were very impressed with their knowledge and work and so we now have them installing security products across all our sites in the south west currently as far south as Plymouth."

Keith Taylor, UK Storage Company

With a 24 Hrs site, CCTV is essential for security. BAC have designed and installed all of the Camera systems on the sites, allowing UK Storage to have eyes everywhere.
